Solvix HMS

One system for the whole hospital.

The complete hospital operations platform — clinical care, diagnostics, pharmacy, billing and administration, unified on a single secure system.

THE PLATFORM

Run your entire hospital on one platform

Solvix HMS replaces the patchwork of disconnected tools most hospitals run on. From the moment a patient walks in to the final settled invoice, every department works from the same record, the same schedule, and the same source of truth.

Unify every department

OPD, IPD, lab, pharmacy, billing and HR share one patient record — no duplicate entry, no reconciliation.

See everything in real time

A live dashboard surfaces queues, bed occupancy, revenue and critical alerts the moment they happen.

Stay in control & compliant

Role-based access, fine-grained permissions and a complete audit trail keep every action accountable.

A SINGLE PATIENT JOURNEY, END TO END

1

Register & triage

Front desk creates the record and issues an OPD token.

2

Consult

The doctor reviews history, examines and records notes.

3

Diagnose

Lab and radiology orders flow back into the chart.

4

Treat & prescribe

Admit to a ward or dispense from the pharmacy.

5

Bill & claim

Charges merge into one invoice and TPA claim.

6

Discharge

Summary, prescriptions and reports reach the portal.

20+

Integrated modules

8

Staff role types

1

Unified patient record

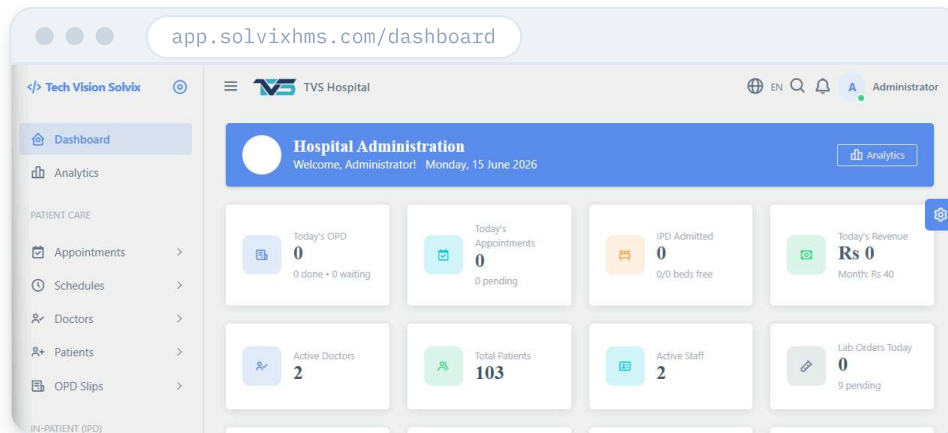

100%

Audited actions

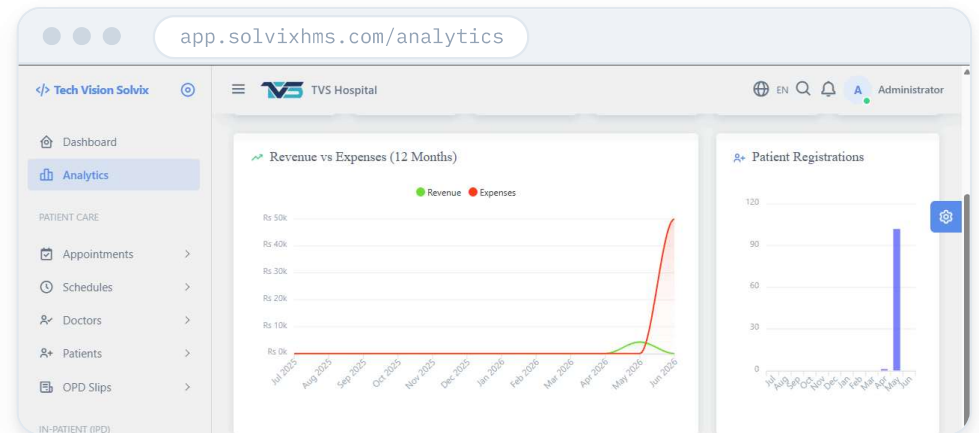

THE PRODUCT

See Solvix HMS in action

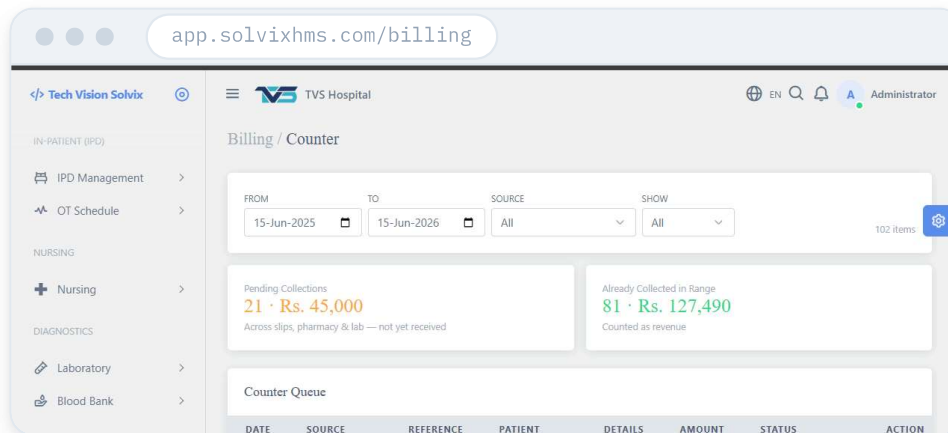

Real screens from the live platform — clean, fast and built for everyday hospital use.

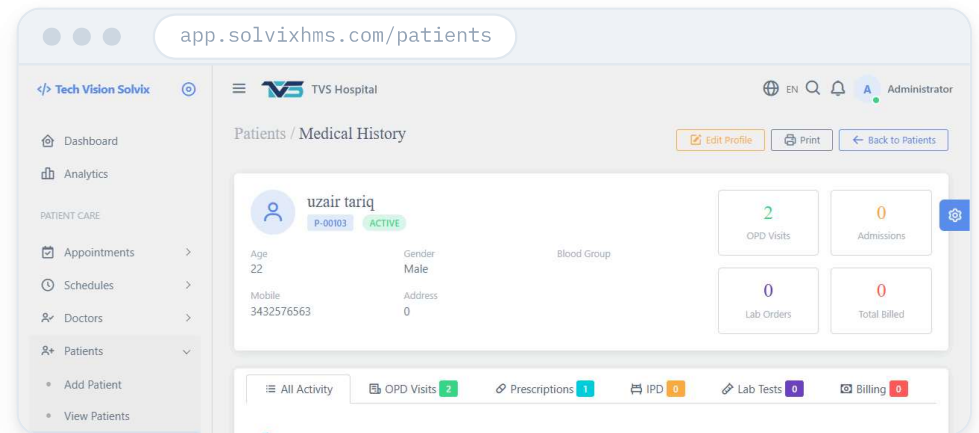

Admin dashboard. OPD, admissions, revenue and the live queue at a glance.

Analytics. Revenue vs expenses, registrations, department load and bed occupancy.

Billing counter. Pending vs collected, the full counter queue and one-click payment receiving.

Patient record. A complete timeline of visits, prescriptions, labs and billing.

MODULES

Everything your hospital does, in one place

Twenty-plus modules, one login, one database. Switch on what your hospital needs today and add the rest as you grow.

Clinical

- Patient records
- OPD & token queue
- Appointments
- IPD / ward & beds

- Supply inventory

Financial

- Unified billing
- Insurance / TPA claims
- Expenses & vouchers
- Doctor earnings
- Multiple payment methods

Administration

- HR & payroll
- Salary slips
- Departments
- Ambulance records
- Birth & death registry

Intelligence & control

- Analytics dashboard
- Multi-format PDF reports
- Role-based access
- Full audit trail
- Notifications
- Public queue display

Less admin, more care, total oversight

Solvix HMS removes the daily friction that slows hospitals down — and gives leadership a clear, real-time picture of operations across every department.

Eliminate duplicate data entry

One patient record is shared across OPD, IPD, lab, pharmacy and billing — staff enter information once, and it's right everywhere.

Move patients through faster

Token queues, doctor schedules and a public OPD display keep waiting rooms moving and patients informed.

Bill accurately, settle sooner

Charges from every department consolidate into one invoice, with insurance and TPA claims handled in the same flow.

Keep full oversight

A real-time analytics dashboard and a complete audit trail mean nothing happens without a clear, reviewable record.

Every department, every record and every transaction — connected and accountable in one platform.

BUILT FOR EVERY ROLE

One login per role, exactly the access they need

Every team member sees a workspace tailored to their job — and nothing they shouldn't. Fine-grained, per-user permissions are enforced everywhere.

Admin

Doctor

Nurse

Pharmacist

Lab Tech

Accountant

HR

Front Desk

Patient self-service portal

Patients book appointments, view bills and download lab reports and prescriptions — easing front-desk load.

Real-time notifications

The right staff are alerted the moment it matters — critical vitals, low stock, pending claims and unconfirmed slots.

Complete audit trail

Every action is logged with who, what, when and IP — plus before-and-after values.

One system for the whole hospital.

Solvix HMS unifies your clinical, financial and administrative operations into one secure platform. Reach out and we'll walk you through it — mapped to how your hospital actually works.

 **One unified record**  **Real-time dashboard**  **Role-based access**
